The data & AI challenges we solve

- AI-ready Data
- Data discoverability
- Regulatory compliance
- Impact analysis

The trusted foundation for data and AI at scale

Clarity and context

Find trusted data instantly for teams and AI agents with AI-powered search, automated cataloging, and column-level lineage, accelerating time-to-insight by up to 70%.

Trust and compliance

Deliver regulatory confidence across GDPR, CCPA, HIPAA, Solvency II and the EU AI Act with AI-driven PII classification and third-party data quality monitoring.

Adoption and collaboration

Enable frictionless collaboration at scale with smart search, lineage and diagrams, collaborative annotations, browser extension, and Slack or Teams integrations.

Activate context, trust, collaboration and engagement

Swiss Life customer success: building AI-ready data at scale

As Swiss Life expanded its data and AI initiatives, it faced fragmented documentation, unclear ownership, and growing regulatory pressure. To scale AI with trust and alignment, it needed a unified governance approach.

DataGalaxy enabled Swiss Life to:

- Centralize and standardize data documentation
- Clarify ownership and accountability
- Improve visibility into data usage and lineage
- Build reusable, governed AI assets

The result: stronger data trust, faster AI initiatives, and scalable governance across the organization with AI-powered search, automated cataloging, and column-level lineage, accelerating time-to-insight by up to 70%.
