

PRODUCTION AND TECHNOLOGY

- Hot and cold stamping
- Continuous thread rolling
- Machining of trunnions and boring of tubes
- Hard facing of coils

PROVIDING YOU WITH SOLUTIONS:

- We work based on your plans to deliver **high-precision, bespoke manufacturing.**
- Our laser cutting, fibre laser and HD plasma machines enable us to quickly fulfil both individual orders and large production runs.

PERFORMANCE GUARANTEES SAFETY

- We work with all types of materials, including steel, special steels and stainless steel.
- We can cut up to 40 mm thick using plasma and 25 mm thick using laser.
- The maximum size of our sheets is 2000 x 4000 mm, so you can think big!

SPIRES

WHAT DOES **A TRUSTED INDUSTRIAL PARTNER** MEAN TO YOU?

A LEADING PLAYER IN THE MARKET.

Our expertise has been recognised and validated by our customers **in France and Europe** for several decades.

A FRENCH COMPANY THAT MANUFACTURES COMPETITIVELY IN FRANCE

Based in Saint-Quentin in the Aisne department, we are a key player in the local economy. For us, **'Made in France'** is both a commitment to quality and competitiveness.

Responsiveness, quality and competitiveness form the basis of our offering.

A COMPANY THAT INVESTS IN ITS PRODUCTION EQUIPMENT

Laser, fibre, HD plasma, high-performance balancing machine, CNC lathes, robots, semi-automatic stripping cell: **our latest-generation machinery** guarantees our competitiveness.

We have a **constant stock of 600 tonnes of material**, managed by a digital storage system that guarantees the traceability of all our metal sheets.

A COMMITTED COMPANY

The culture of excellence is shared by everyone in the company.

We are committed to:

- the quality of our raw materials and services
- the reliability of our production
- meeting our deadlines
- taking your specific requests into account

OUR PRODUCTION:

STAMPED SCREW SPIRALS

- Regular pitch or progressive pitch
- Conical or cylindrical
- Solid formed or welded-on
- Notched
- For stainless steel or steel mixers, etc.

CONTINUOUS FLIGHTS

- Bare
- Mounted on tube
- With or without trunnions
- Ribbon-shaped for mixer

ROTORS

CUSTOM-MADE ARCHIMEDES SCREWS

FOR WHICH APPLICATIONS?

- **Tubular screw conveyors**
- **Trough screw conveyors**
- **Screw extractors**
- **Screw feeders**
- **Mixers**
- **Augers**
- **Compactors**
- **Bulk material transfer**
