

FOODCHAIN ID®

Your trusted source for actionable food industry insights and solutions

Since our founding, we have experienced an evolution, steadily and purposefully strengthening our offerings with the collective intelligence of the most knowledgeable companies in the industry.

It has been our goal to be a trusted partner to our clients, providing data, expertise and solutions that fit the way you work.

Five key service areas

FoodChain ID's focus lies within five key service areas built to address the constant and evolving challenges that our customers face every day – from ever-changing consumer tastes to complicated regulations, to new expectations required of regulatory professionals and so much more.

Product Development Solutions

Our solutions enable customers the ability to create better, more compliant food faster. They streamline the development process – from specifications to recipes to labels – by managing costs, compliance, nutrition and more, and can truly revolutionize your R&D productivity.

Food Safety Solutions

Designed to save our customers time and reduce food safety risks, our proprietary tools support Global Food Safety Initiative (GFSI)-required food fraud vulnerability assessments and daily supply chain food safety monitoring of ingredients and supplier threats. We provide global certification and audits for all the main food safety standards, as well as supplier audits.

Regulatory Compliance

With FoodChain ID you enjoy access to timely and accurate data plus the expertise to help you make sense of it all. Our regulatory data sources, product assessment tools, and market intelligence can also be integrated into your workflow so they suit the needs of your business.

Product Certifications

Pursuing multiple certifications can be overwhelming. With proprietary tools to manage your supply chain data and documentation, plus track your certification status, our experienced staff makes the certification process efficient.

Testing Solutions

We'll design a cost-effective testing protocol, customized to your objectives, along with reliable technical expertise and comprehensive customer support. From DNA-based testing to microbiological testing and more, our dedicated team will help you navigate the complex global regulatory landscape and fulfill market demands.

Our services are designed to bring you accurate, actionable information overlaid with relevant expertise from food industry professionals with global experience.
