NEXUS

ENTERPRISE DATA. UNLOCKED.

INVESTOR INTRODUCTION

Compliance shouldn’t bottleneck your growth.

Decisions are moving from dashboards to AI, yet most enterprise data **can’t lawfully feed it**. NEXUS converts it into a **compliant synthetic version**, ready for any AI workload.

Watch the explainer video | nexusdefense.fr/#film

THE PROBLEM

Most of your data is locked away from AI.

~85% of a data estate is left unusable for AI by privacy law.

3/4 of new analytics expected to run through generative AI by 2027 (Gartner).

HOW IT WORKS

Your data in, compliant synthetic data out.

THE PIPELINE

NEXUS Fabric

Learns the patterns in your tables and generates synthetic data that behaves like the original. Every job runs zero-trust end to end: plaintext is never exposed, not to us, not to the cloud.

INCLUDED **Data Trust Platform** to prepare, govern and deliver your data. At no extra cost.

BUILT FOR REGULATED DATA

Financial institutions first, then any enterprise working on sensitive data.

WHERE WE ARE

Gathering interest and feedback now, with pilots expected by Q2 2027.

BUSINESS MODEL

Enterprise licensing with volume pricing. Cloud-native, private cloud optional.

PROOF & MOMENTUM

96%
ML value retained
Synthetic-trained vs real-trained models

80%
Of metrics won
36 of 45, ahead of every comparator tested

0
Real records copied
No synthetic row reproduces a real one

Up to 10x
More data put to work
Depends on your data and use case

Working platform
Live demo, with recorded workflows in the platform documentation

Early demand
Explicit interest from Tier 1 enterprises

NVIDIA + Scaleway
NVIDIA Inception
Scaleway Founders Program

Team
Multiple PhDs from frontier institutions

Benchmarks: nexusdefense.fr/benchmarks **Workflows: nexusdefense.fr/product-documentation**

Tabular data today; further modalities and integrations in development. Privacy and utility are assessed for each use.

Raising €5M seed

Join us in building the data infrastructure layer of the AI economy.

18-24 months: platform launch, sovereign infrastructure and commercial rollout.
